Criteria and weighting	Level	Comments
Knowledge and understanding of the topic/ issues under consideration (30%) To provide an overview of current knowledge on the chosen topic	Excellent	There is excellent intrinsic and practice based knowledge of the content linking to the assignment title. There is also mostly robust theoretical underpinning, [although this could have been evidenced a little more here and there with citation]. Generally speaking a diverse and layered discussion that linked well to your assignment title.
Criticality (30%) To highlight similar and contrasting views on your chosen topic	Very Good	Overall criticality is very good, it is excellent in places, but is not consistently excellent enough to attain the next grade boundary here. For future summative work for that consistency all the way through the assignment to achieve consistently excellent criticality all the way through. There is evidence of dynamic discussion and debate through the initial to mid-stages of the assignment, however the latter stages are not as strong regarding this point. There is theory and practice in evidence in the content which is appropriate.
Use of relevant sources (20% To demonstrate an awareness of relevant, current literature	Very good	Very good use of research on the whole. You do need to evidence all areas of research with citation [as well as a long reference list at the end of the assignment] where it occurs in text. Research references are current and up to date which is appropriate for the summative and subject matter.
Structure and Presentation (as detailed in the assessment guidance) (10%)	Very Good	The assignment is completed to a professional academic standard generally, with a title page, contents page and page numbers for example. However, some of your paragraphs are a little dense and these need breaking for future. Evenly weighted paragraphs mean that the discussion is equally distributed between topics. When there are very dense paragraphs it denotes either a lack of time management

Positives:

- Mostly very good outcomes
- With Excellent knowledge demonstrated
- And a very good outcome overall

Points for development:

- There is the odd match to original phrases in your content and so avoid this moving forward
- Ensure there is a consistent level of criticality in your content
- Cite more often where there is research or a fact cite
